

WELCOME TO

# TECHNOVATI N

Week 4 - October 15

**MICHIGAN STATE** UNIVERSITY

# Agenda

- Icebreaker
- Lesson:
  - User Input Review
  - For Loops
- Coding challenges
- Standup
- Temperature Check

Ice Breaker!

Telephone Charades!

# User Input (Text)

**Variables** can also be used to save *user input*, letting the user indicate values on-the-fly while running programs!

Use assignment with the `input("prompt")` function!

```
clr = input("Enter a color: ")  
# if the user types "green"  
color(clr)
```

clr →  
"green"

```
clr = input("Enter a color: ")  
# if the user types "blue"  
color(clr)
```

clr →  
"blue"

# Introducing Loops!

```
1 circle(20)
2 penup()
3 forward(40)
4 pendown()
5 circle(20)
6 penup()
7 forward(40)
8 pendown()
9 circle(20)
10 penup()
11 forward(40)
12 pendown()
13 circle(20)
14 penup()
15 forward(40)
16 pendown()
17 circle(20)
18 penup()
19 forward(40)
```

For loops are used to repeat code a fixed number of times.

# Introducing Loops!

```
1 Tracy, repeat this code 5 times!  
2   circle(20)  
3   penup()  
4   forward(40)  
5   pendown()
```

For loops are used to repeat code a fixed number of times.

# Introducing Loops!

For loops help us by:

- shortening our code
- making it easy to alter our code

```
1 circle(20)
2 penup()
3 forward(40)
4 pendown()
5 circle(20)
6 penup()
7 forward(40)
8 pendown()
9 circle(20)
10 penup()
11 forward(40)
12 pendown()
13 circle(20)
14 penup()
15 forward(40)
16 pendown()
17 circle(20)
18 penup()
19 forward(40)
```

19 lines to 5  
lines!

```
1 Tracy, repeat this code 5 times!
2   circle(20)
3   penup()
4   forward(40)
5   pendown()
```

# Introducing Loops!

```
1 circle(20)
2 penup()
3 forward(40)
4 pendown()
5 circle(20)
6 penup()
7 forward(40)
8 pendown()
9 circle(20)
10 penup()
11 forward(40)
12 pendown()
13 circle(20)
14 penup()
15 forward(40)
16 pendown()
17 circle(20)
18 penup()
19 forward(40)
```

For loops help us by:

- shortening our code
- making it easy to alter our code

Change  
radius to 50  
pixels

```
1 Tracy, repeat this code 5 times!
2   circle(20)
3   penup()
4   forward(40)
5   pendown()
```

# Writing For Loops

`for i in range (amount of times to repeat):`  
*Commands to repeat go here (indented!)*

```
1 Tracy, repeat this code 5 times!  
2     circle(20)  
3     penup()  
4     forward(40)  
5     pendown()
```

Write  
loop

```
1 for i in range(5):  
2     circle(20)  
3     penup()  
4     forward(40)  
5     pendown()
```

# Coding Time

- Let's use today to work on the exercises we haven't been able to finish!
- Work at your own pace! Ask questions!
- If you are all caught up through (Unit 3 Section 1), explore the weekly challenges or the Sandbox in CodeHS

# Challenges

# Ready, Set, CODE!

Command	What does it do?
<code>name = value</code>	Saves the value in the variable
<code>input("prompt")</code>	Prints prompt and waits for user input
<code>int(...), float(...)</code>	Converts a value to a number ( <code>int</code> or <code>float</code> )
<code>for i in range(number)</code>	Initialize a loop

# Standup

- What was an exercise you worked on today?
- What is something you were successful at?
- What was a challenge you had while coding?

Bonus Hours!

# Attendance and Temperature Check

## Temperature Check
